Underground Warning Tape

MegaStretch®

For those who require a stretch product, MegaStretch offers you:

- A unique polymer that gives MegaStretch the strength and stretch you need for plowed-in installations.
- This combination also provides the stretch properties needed for increased visibility during excavation.
- Lead-free pigments to insure color vibrancy underground.
- Bold black letters include message and installation recommendations.

Use widest tape possible and bury as close to the surface as practical.

NON-DETECTABLE

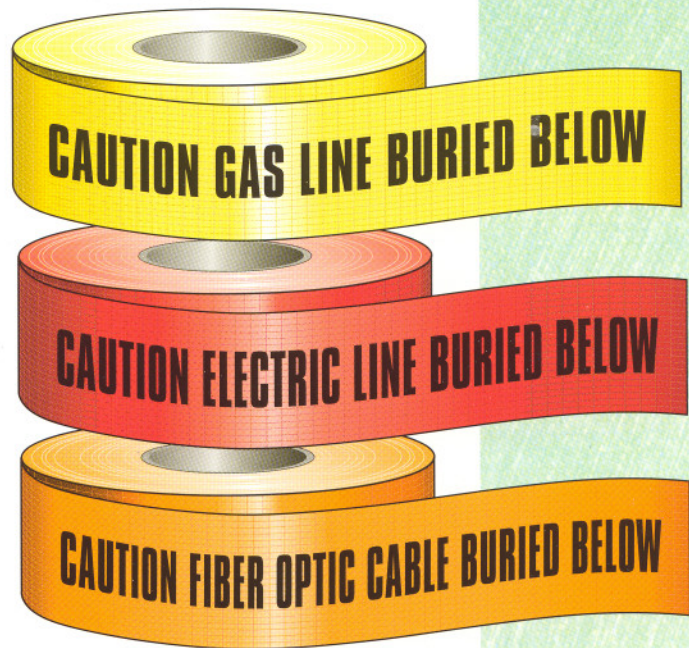

Underground Warning Tape

DuraTec® Reinforced

The premier non-detectable woven polyethylene product for the "Last Line of Defense" against third party damage.

- Empire's highest level of non-detectable dig-in damage prevention.
- Patented woven reinforced design will not stretch when dug into so the printed message stays intact and is easy to read.
- High tensile strength prevents breaking during plowed-in installations.
- Lead-free pigments to insure color vibrancy underground.
- Bold black letters include message and installation recommendations.

Use widest tape possible and bury as close to the surface as practical.
